9-10am CST

MAS 90 • MAS 200 Version 4.4 Is Here! New SageCRM & FAS Integrations

The latest Sage V 4.4 comes with more breathing room, starting with an updated and enhanced desktop area to provide you with an easy access point to information. We'll start with that, and then drill into the EES option for your MAS 90 or MAS 200; where the integration of FAS Fixed Assets means goods received can be designated as Fixed Assets and automatically flow into the financial information, immediately taking all allowed depreciation tax savings. We'll also showcase the feature-rich SageCRM which introduces business process automation and an enterprise-wide access to vital customer information anytime, anywhere so you can better manage your business with an integrated approach to field sales, inside sales, customer care, and marketing.

Presented by Michelle Page, Consultant MAS 90 • MAS 200 • MAS 500 Certified

9-10am CST

MAS 90 • MAS 200 Version 4.4: Inventory, Purchase Order, Bill of Materials

Focusing on workflow and business processes, this last 4.x releases applies the power of the Business Framework™ standards to **Purchase Order, Inventory Management, Bill of Materials and Bar Coding**. Big news is that the Customer number field grows to 20 alphanumeric characters and Item Numbers to 30, which delivers improved workflow and business processes. We'll show you how to take advantage of those, and a powerful ad-hoc reporting tool that gives visibility into every customer's business. We'll walk you through the new grid entry format, new batching features, and new role security features. The PO views will include drop ship information for more visibility into the details of that business process.

Presented by Catherine Howell, MBA, Consultant MAS 90 • MAS 200 • MAS 500 Certified

10:30-11:30am CST

Windows 7 and Office 2010 – The Cool Features You Need To Know

From the time you see the Start menu of Windows 7 - the latest Microsoft Operating System - you know something is different. This webinar takes you through some of that new functionality, starting with Task Bar and Live Thumbnail previews. We'll also show you more on location-aware printing, Jump Lists, Aero Peek, Snap and other tools you can use like Snipping Tool and Sticky Notes. Then it's on to Office 2010, with its updated Ribbon Bar and features like co-authoring where you can work on a file with multiple people at the same time, Office Backstage™ view, which replaces the traditional File menu and new features of Outlook. A great overview to prepare for you for Microsoft's latest generation.

Presented by Chris Kent, MCSE, MCDBA, MCTS, Technical Consultant

9-10am CST

Business Intelligence Powered by MAS 90 • MAS 200 • MAS 500

The tool is **Business Insights Explorer (BIE)** and we'll cover how you can use it to navigate through data, as well as preview and drill in to follow a transaction from beginning to end. The BIE comes with predefined views of commonly used sets of data, such as the Customer view, Sales Orders view, and Open Invoices view. Data can be exported to a variety of output types, including Microsoft Excel, Access, Word, XML, and Web pages. Data in the Data View grid can be filtered, sorted, grouped, and summarized. We'll also cover how changes to the Data View grid can be saved to a setting, and information in the grid can be printed and saved to a report.

Presented by Michael Davis, CPA.CITP, MCSE, Senior Consultant MAS 90 • MAS 200 Certified

See full LKA University Webinar Details at www.kianoff.com/LKAU

L. Kianoff's LKA University comes to your computer this spring with four 1-hour training webinars scheduled 4 consecutive Thursdays starting May 6.
