Adventure Images: A Picture of Success with MAS 90

Ascending Mount Everest is often used as a metaphor for the ultimate exploit. In the same way, photographs of heart-pounding adventures can represent the risk and reward of “ascending the mountain” or “reaching the top” in any endeavor.

Corporate marketers often use images of climbers clinging to sheer vertical walls and skiers soaring off snow-covered cliffs — and they pay handsomely for the privilege. When a company seeks to incorporate an adventure photo into its message, they can call Adventure Photo and Film — a stock photo agency that specializes in dramatic outdoor imagery.

THE CHALLENGE

Although known for depicting adventurous challenges relating to the corporate workplace with their selection

of awe-inspiring photographs, the company has faced its own challenges with back-office organization right in their home office. How does a company handle such daunting tasks as tracking commissions, paying royalties, invoicing customers, and developing financial reports that clearly state profits or losses?

“When I was hired at Adventure Photo and Film five years ago, we were using an outdated version of ACCPAC that was too basic and inflexible for our accounting needs,” says Sandy Dowdy, controller. “The owner wanted financial statements that reflected the current status of all aspects of our two business entities. Since the rigid format of the old software wouldn’t allow me to prepare the types of statements we required, I did some research and discovered MAS 90.”

CONTINUED

“MAS 90 has given us tremendous flexibility. I’m now able to provide the owner with a line-by-line chart of accounts for both of our business entities.”

THE SOLUTION

MAS 90 is now used to manage the books of both of the company’s entities: Adventure Photo and Film and Rick Ridgeway Productions, the owner’s personal book-writing and filmmaking business. For example, when National Geographic sent a large monetary advance for Ridgeway to produce a documentary of his ascent of a big ice wall in Antarctica, the advance was entered into MAS 90’s Accounts Receivable module for the Rick Ridgeway Productions entity. As he bought equipment, outfitted the expedition, flew into the region, and began filming, a continual flow of receipts was sent back to the home office, where they were processed through the MAS 90 Accounts Payable module.

As you might imagine, Ridgeway and his team generate heavy expenses when they are out in the field, but their bank account is limited. Before a trip begins, Sandy uses MAS 90 to develop a budget for the adventure. As receipts come in, she keeps the team continually apprised of how their spending is working against their budget, and outlines where they need to cut back and where they can spend more.

Adventure Photo and Film manages a huge database of licensed images of both Ridgeway’s photos and those of other adventurers. The invoices generated from use of these images are managed through the MAS 90 Accounts Receivable module. When customers select an image, they negotiate usage rights and price, which are then entered into MAS 90. From this information, a monthly statement (customized, using Crystal Reports) is sent to clients. “Compared to the statements we used to send out, these are much better looking,” Sandy notes. “We can easily change and improve the appearance of our

customer mailings with MAS 90.”

Vendor payments to photo labs, shipping costs and other overhead expenses are all tracked in the Accounts Payable module. MAS 90 generates income statements and balance sheets for each of the two business entities. “MAS 90 has given us tremendous flexibility because I’m now able to provide the owner with a line-by-line chart of accounts for both business entities,” Sandy explains. “It also provides an analysis of the average billing amounts, average days outstanding and the current debt-to-equity ratios, all of which I used to work out manually.”

Finally, employees receive bonuses based on profits generated from the previous quarter. MAS 90 enables Sandy to compare actuals to budget and calculate bonus payouts. “I use MAS 90 to help us set financial goals and keep track of where we are compared to those goals at all times. MAS 90 is a major component of our ability to analyze and maintain the profitability of Adventure Photo and Film.”
