

Transplanting New HRMS System Encourages Growth for Leading Hair Clinic

Customer

The Bosley Medical Institute, a leader in medical hair restoration

Challenge

Provide online employee access to their personalized HR information

Solution

Abra Enterprise™

Results

Reduced administrative overhead and increased service levels with online information access for employees

The Bosley Medical Institute – based in Beverly Hills, CA – has a mission to provide its employees with a positive working environment based on trust and mutual respect. In 2001, Bosley sought to replace its DOS-based system in their corporate office, which required them to communicate with remote employees over the phone.

"We're very excited about how Abra Enterprise™ has streamlined our organization," said Susan Chan, HRIS benefits analyst.

"Best offered the optimum usability and features on the market to meet our growing needs."

Bosley implemented Best's Abra Enterprise™ solution to better track its HR information and to communicate HR information with its 430 employees across the country. Abra's Roles module was rolled out to 12 of its 30 locations across the U.S. in early 2002, enabling employees to view their payroll, attendance and benefits information online.

The **ABRA** Enterprise™ family includes:

- Abra Enterprise™ Human Resources
- Abra Enterprise™ Payroll
- Abra Enterprise™ Employee and Manager Roles
